Mr. Steve Brecher,
Vice-President, Sales
22 lafleur avenue south,
Saint-sauveur J0R 1R0,
Quebec

Dear Steve,

Thank you for your participation in our recently completed Shops at Don Mills, Ontario's first outdoor urban village.

Karajaal's robotic water feature, strategically located in the heart of our property, is truly an engineering triumph that brilliantly complements our overall design.

We appreciate the regular progress reports that you provided to our extended team over the past 18 month period of design, development and construction.

In keeping with our "green" initiatives, we value your use of low power devices such as LED and control drives, to reduce overall consumption and wear and tear.

We are confident that your monitoring and maintenance program will ensure a seamless operation for our customers and children to enjoy in the years ahead.

We are pleased to consider Karajaal for our future projects that include ecological water features.

Best regards,
THE CADILLAC FAIRVIEW CORPORATION LIMITED

Rudolph Adlaf
Senior Vice-President, Architecture and Design Division
